PROFESSIONAL SUMMARY

I am a Computer Science Student at Louisiana Tech University pursuing an accelerated academic path with a developing focus in Cybersecurity. Having graduated high school early and begun university ahead of the traditional timeline, I have developed quite a strong foundation through independent projects and hands-on labs. I am seeking opportunities to develop and apply my skills in a real-world professional environment.

PROJECT EXPERIENCE

Cybersecurity Home Lab Assessment

Linux, Networking, Nmap, VirtualBox

July 2026

- Built an isolated cybersecurity Lab using Ubuntu Virtual Machines and configured private network connection for a controlled security assessment
- Performed Network Reconnaissance and service enumeration using Linux networking tools and Nmap to analyze the target machine's exposed attack surface.
- Identified, remediated, and verified a controlled information-disclosure vulnerability while practicing professional security documentation through a structured lab report and supporting evidence.

EDUCATION

Bachelor of Science in Computer Science – In Progress Concentration: Cybersecurity

Louisiana Tech University | Ruston, LA

Expected Graduation: Winter 2029

GPA: 3.8/4.0

SKILLS

- Linux, Python, Networking, Git

CERTIFICATIONS

- Fundamentals of JavaScript, HTML, and CSS - Level 1 IBC | Operation Spark | 2025
- Security + | In progress
